

Detect diversion in your healthcare facility

Confirm the identity and concentration of wasted medication with WasteWitness®

WasteWitness® delivers hard data of each waste incident

How it works

1. Medication waste is pushed through WasteWitness' patented FlowCell™
2. The drug and concentration are verified in seconds
3. Pass or fail results are delivered to administrators through the powerful, sophisticated PharmID web portal

Same technology used by pharmaceutical companies

Reporting portal enables drill-down for diversion detection, including five failure modes

A wireless connection lets you take waste identification to the point of care

Putting advanced technology into the hands of healthcare providers
